

**P**rognosticacyon of Maistre Joh.  
 Thibault Astrologer / to the Emperours  
 Maicste / and to my Lady. .cc. The yere of our  
 Lord god. M. L L L L .xxx. calcaled vpon  
 The horizon of the to Wne of Ant Verpe / cōtey  
 nyng the foure parties of the yere / and the in  
 fluences of the ne We Moones / With theyr  
 quartres / firste and last / and of peas / of  
 W. / and of sycknesses of this yere / and  
 of dy. .s countres / and the renouu  
 cion of the kynges / and prynces /  
 and the influence of .ii. Eclipses  
 of this present yere. and cetera.

**C** Salut au Lecteur.

**O**r to iuge well the in-  
fluence of this present yere.  
M.L.L.L.L. and .xxx. It  
muste be Well consyderyd/  
moche vpon the reuolucyon  
of the entryng of the Sonne  
in the sygne of Aries / that vpon these .ii. Ecli-  
pses / that is to say the Sonne & of the Mone /  
there Where it is Well for to discusse theyr in-  
fluenc; that they shew. Dyuers there be that  
by stronge oppynyon holdeth this purpose (by  
cause that Ptholomeus i this maner Wryte)  
that one Eclipse gyueth the effect of his influ-  
ence after the poynt paste of the Eclipse: this  
is no lesse / but a thyng contrary to naturall  
reason. *Dei bi gratia.* An eclipse is to compare  
to tWo men / that cometh one ayenst an other:  
thretenyng & lokyng the one vpon the other  
With euyl and angry lokes / this hangyng  
than that they come one agaynst the other / &  
all them that se them feryth nat theyr lokes /  
vnto the tyme they shall be departyd / the one

and mouable / and aboute the ende great tem-  
pestes of Wyndes With thondre & lychtnyng in  
in dyuers places / and reygnyng dyuers syn-  
nelles With deth of gentylmen: as men of Ill-  
fytte / and of Warre / discorde bet Bene Lorde  
temporelles and spirituelles / and other syn-  
nes that We declare in a chaptre hereafter /  
is a cause that Jupiter is i opposite of Mars

**¶ Of the pryme tyme.**

**¶** The pryme tyme of this yere shal be at the  
begynnynge moyste / and vnstedfaste tyme  
obscure and colde / With froste . And aboute  
the ende great colde / froste / and snowe / so  
that maner by the colde & moyste that shal de-  
stroye the Dynes oyles / and fruytes in many  
dyuers places.

**¶ Of Somer.**

**¶** The somer of this yere shal be fortunable  
and metely temperat / & in dyuers places grea-  
Wyndes / & horryble tempestes / than in dyuers  
places shal be by the tempest thorne do W  
many trees and edyfyces.

**¶ Of the tyme of Heruest.**

**¶** The tyme of Heruest this yere shal be mete-  
in fame With maner of Wyndes & lychtnyng in

### **C**Janyuere.

In the month of Janyuere cometh the first  
quarter the thurs day the. vi. day. p. houre &  
p. vi. mynutes at nyght / Wynde mutable /  
foure / & in some places snowe. **C**The full  
mone the thurs day the. viii. day. vi. houre and  
iii. mynute at nyght / colde / obscure / With  
feste & moyste. The laste quarter the fryday  
xxi. day. i. houre. iii. mynute after none /  
feste / obscure & Wyndy. **C**The newemo-  
ne the saturday. xxix. day. viii. houre. l. mynu-  
te before none / obscure / blacke froste / Wyndy  
foure / snowe. **C**Feueryere.

In Feueryere cometh the firste quarter the  
sunday the. v. day. iii. houre. xxxix. mynute  
before none / obscure / blacke froste and Wyndy  
With snowe. **C**The full mone the saturday  
the. xii. day. viii. houre. l. vi. mynute before  
none / obscure colde / snowe / and in some pla-  
ces hoar. The last quarter sonday the. xv.  
day. ix. houre. xxi. mynute before none / colde /  
moyste and metely fayre. **C**The new mone  
the sonday. xv. day. ix. houre. xxi. mynu
